Dear SRACA Committee.

I would like to extend my heartwarming thankyou for giving me the opportunity to attend the FSRACA National Conference held recently on the Gold Coast on the 30th September to the 2nd October.

My name is Angela and I'm from a coastal town called Geraldton in WA.
I have worked in the CSSD sterilizing department in Geraldton for 31 years and thoroughly enjoyed the experience of learning new things from all your speakers throughout the 3 days.

I thought the leadership forum and workshops on day one Wed 30 Sept to be very informative and well presented.

Dr David Weber the International speaker from North Carolina was very impressive having published over almost 600 scientific papers in healthcare is a tremendous achievement in his career.
His knowledge of infectious diseases, disinfection and sterilisation knowledge was very interesting to listen too.

Brooke Hanson the second Keynote speaker was truly amazing
On Thursday 1st October while Brooke was presenting her presentation everybody in the room only had eyes for her
To speak about her life and journey was just so inspiring something I will never forget.

Julie Cross the third keynote speaker was probably the funniest presenter I have ever listened to, she bought this awesome vibe to the room and everyone was just in aww of her.

I thought all presenters throughout the Conference had great presentations, I'm sure a lot of them thought they could have more time on their topics
But I have come away from this Conference with a lot more understanding of the CSSD and its surrounds

Thanks again for allowing me to attend I thought it was very well done
The catering was very well catered for and the displays and talking to all the Trade Exhibitors was very well done listening and seeing all the new products was awesome

Thanks again to SRACA
Regards
Angela Watson
Advanced sterilising technician
