FSRACA 2026 National Conference

Waves of Innovation, Anchored in AS/NZS 5369:2023

Attending the 2026 FSRACA national conference was an incredibly enriching experience, one that truly underscore the value of being a member here.

Profesisonal growth – Listening to keynote presenters from national and international leaders, best practice for the reprocessing of reusable medical devices, effective cleaning, increased complexity with advances in surgery, design of reusable medical devices, track and trace, strong local practices, quality and risk management, occupational exposure to disinfectant, sustainability, updates from the TGA, GENCA and CDC.

Networking – The opportunity to connect and meet with trade in the exhibition area, see and ask questions of the various equipment on offer.

Meeting and chatting with other colleagues from rural and remote parts of Australia about the challenges they face with staffing and equipment.

In future, I am more than happy to be involved and share what I have learnt with others in WA. I will continue to grow and learn in this space with all my esteemed colleagues. Thank you for the sponsorship and the opportunity to attend the conference.
